Environmental impact there are a variety of capital projects that have a positive impact on the environment. These include but are not limited to linear infrastructure renewal/improvements, vehicle and equipment purchases that have improved emissions (including traditional fuel based vehicles, as well as hybrids/fully electric), and specific projects like EV chargers

FINANCIAL: Our commitment to sustainable infrastructure and services is set out in Policy No. COR-POL-O60, *Capital Prioritization & Investment* and Policy No. COR-POL-061, *Debt Affordability & Management*.

The capital budget for 2023 has been increased per the Long Term Financial Plan by 5% for renewal projects and one-time capital funding has been included. One-time funding will continue to increase until such time as it is utilized to apply to debt repayments for major capital investments.

LEGAL: The Department/Division has determined that there are <u>no legal considerations</u> associated with this matter at this time. The **Office of the City Solicitor** was not specifically consulted with respect to this administrative report. Final budget resolutions are all reviewed by the Solicitor prior to being presented to Council which is currently planned for November 28, 2022.

COMMUNICATIONS: Staff from Finance work closely with Communications Staff to prepare communications related to annual budgets.
