Downtime	Means those times when the Solution is (i) going through a service degradation, (ii) not operational, or (iii) is otherwise unavailable to Users.
Emergency Maintenance	Any emergency, unplanned maintenance initiated by or on behalf of the Supplier where: <ul style="list-style-type: none">(i) The Local Government reasonably determines that the Solution, or any part thereof, has or may have developed a Defect or Incident, and notifies Supplier of the same, or(ii) Supplier reasonably determines that Supplier systems or the Solution, or any part thereof, has or may have developed a Defect or Incident, and such maintenance work is reasonably and

immediately necessary to correct such Defect or Incident.

Excluded Downtime	Means Downtime caused by or resulting from: <ul style="list-style-type: none">(i) Scheduled Maintenance;(ii) a Force Majeure Event;(iii) the acts or omissions of the Local Government, or a third party that is not a Supplier subcontractor;(iv) the operation of Third Party Components; or(v) software, systems, equipment or other products or services operated by a third party that is not a Supplier Affiliate or a service provider of the Supplier.
Helpdesk	Helpdesk service, including ticketing tool and live technical support (as needed), provided by the Supplier.
Transit	Local Government division that manages the service.
Incident	An unplanned interruption in the Solution, reduction in the quality of the Solution, or a failure of a configuration item that has impacted the production environment of the Solution and the Local Government's ability to use the said Solution, assuming proper usage of the system. These can be reported to the Supplier by Local Government staff or discovered by the Supplier. Incidents are prioritized for resolution based on impact and urgency.
Regular Business Hours	The hours between 9:00 AM and 6:00PM AT during the week (Monday to Friday), excluding statutory holidays observed in the Province of Quebec.
Release(s)	Updates, annual upgrades, modifications, error corrections, bug fixes, hotfixes, patches, optimizations or other Supplier developed applications released to its customers without charge to stabilize or incrementally improve the performance, functionality or capabilities of the Solution.
Scheduled Maintenance	Includes, but is not limited to, system updates/upgrades, software patches or fault fixes or configuration changes which are agreed to and carried out in accordance with the scheduled maintenance process described later in this Schedule.
Service Availability	The percentage of time in a month during which the Solution is operational, running on the Supplier's servers and available for Users, not including Excluded Downtime.

Service Availability Target	As defined in Section 7 of this SLA.
Solution	Those parts of the Services that constitute the Supplier's SaaS solution offerings, applications and integrations (including Dependencies), and the components thereof, as are described in the Proposal and this schedule and may be itemized in Schedule C – Fee Schedule, having been developed and/or deployed in response to the RFP requirements; but excluding Consulting Services.
Standard Request	A standard request is a change that is low risk, relatively common and follows a known procedure or work instruction. These requests are by definition configuration tasks that the Local Government staff could also perform and do not require a code deploy. For example; a field label change, a password reset or adding a new user.
Supplier	Supplier will develop the Solution and will provide hosting, development, implementation, support, management, maintenance and enhancement Services for the Solution per the terms described in this Agreement.
Support Services	Online self-help technical support service (step-by-step trouble- shooting and solutions) provided by Supplier.
User Acceptance Testing (UAT)	In tandem with the System Testing described under Schedule B, and thereafter during any Release that is capable of degrading the performance of the Solution, Users will test the Solution to make sure it will execute required tasks in real-world scenarios, according to specifications. To the extent possible, this will be done by Users of the Solution in a dedicated UAT environment. Test scripts may be designed by the Local Government and the Supplier to match functional user requirements.
Users	The employees, contractors and agents of the Local Government who are designated by name, position or classifications as being end users of the Solution.

4.0 Service Level Targets

4.1 Summary

There are four (4) identified service level targets types, each elaborated upon in the below sections.

- 4.1.1 **“Incident Resolution Targets”** – Tickets resolved within thresholds identified by Service Criticality. Incident Resolution Targets are made up of three component parts: “Target Response Time”, “Target Resolution Time” and “Resolution Efforts” (see table at Section 5.4.2 for details).
- 4.1.2 **“Standard Request Fulfillment Targets”** – Tickets acknowledged, estimated, and queued for execution within thresholds identified by Priority. See Article 6.0 for details.
- 4.1.3 **“Service Availability Target”** – The Solution must be available based on agreed metrics, measured monthly (see Article 7.0 for details).
- 4.1.4 **“Performance Measurement Target(s)”** – Response Time for a given web request, measured during a given calendar month and reported monthly (see Article 8.0 for details).

5.0 Incident Resolution

5.1 Service Criticality

The **“Service Impact”** of an Incident is derived from **“Service Criticality”**, which measures the impact of degradation, interruption or unavailability of the Services on the Local Government’s operations and/or business processes. The Local Government has disclosed to the Supplier, and the Supplier has acknowledged, that the operation of the Solution in accordance with the Specifications is Business Critical meaning.

Business Critical – A business critical Solution requires continuous availability, though short breaks in service are not catastrophic. Availability is required for effective business operation.

5.2 Urgency Criteria

“Urgency” is assigned by Transit prior to escalation to the Supplier and is determined by factors including, but not limited to:

- (i) Number of the Local Government’s customers affected by the Incident
- (ii) Urgency of resolving the Incident
- (iii) Length and scope of the production outage
- (iv) Availability of a solution / workaround

5.3 Priority Criteria

The “**Priority**” of an Incident is calculated by evaluating the Service Impact (see Section 5.1) and Urgency of the Incident (see Section 5.2). The Solution is not **Business Critical**, since business activities are not significantly impacted by an APC temporary interruption, and therefore the Priority is assigned as P1, P2, P3 or P4, in accordance with the Table at Section 5.4.2.

5.4 Incident Response & Resolution Details

5.4.1 The Supplier will use, and be able to demonstrate, Commercially Reasonable Efforts to achieve resolution or workaround for all logged Incidents based on Priority level and definition. In all cases, the Supplier attempts to resolve the Incident as quickly as possible.

5.4.2 The following provides for: (i) the applicable timelines for the Supplier’s acknowledgement of Incidents reported by the Local Government support team; (ii) the resolution targets for the Supplier to achieve upon its acknowledgment of an Incident and (iii) the Supplier’s applicable resolution efforts for each Priority.

Priority Level & Definition	Target Response Time	Target Resolution Time	Resolution Efforts
<p>P1 – Critical The Solution is (i) inoperable, or (ii) persistently unavailable. The Services (or parts thereof) are not being delivered, resulting in the Local Government’s operations being severely impaired.</p>	<p>Within 2 hrs of (the earlier of) Incident being discovered by Supplier or reported by the Local Government</p>	<p>Within same business day of (the earlier of) Incident being discovered by Supplier or reported by the Local Government</p>	<p>The Supplier will assign and make available dedicated personnel, support and technical resource(s) to work directly with the Local Government’s assigned personnel and resource(s).</p> <p>The Supplier’s personnel, support and technical resource(s) will work diligently with the Local Government’s personnel and resource(s) to resolve the Incident within the P1 Target Resolution Time or establish a workaround acceptable to the Local Government during that time. The Local Government’s assigned personnel and resource(s) will be available on a 24 hour basis to support Supplier’s troubleshooting efforts.</p> <p>The first 3 tiers of escalation hierarchy (see Section 2.3.1) are automatically notified when any critical issues occur.</p> <p>The Supplier will remain in regular and ongoing contact with the Local Government resource until Incident is resolved.</p>

<p>P2 – High The Solution is not continuously available; breaks in service are intermittent and of short duration. Delivery of the Services (or parts thereof) are adversely impacted, resulting in the Local Government's operations being significantly impaired.</p>	<p>Within 4 hrs of (the earlier of) Incident being discovered by Supplier or reported by the Local Government</p>	<p>Within 3 days of (the earlier of) Incident being discovered by Supplier or reported by the Local Government</p>	<p>The Supplier will assign and make available dedicated personnel, support and technical resource(s) to work directly with the Local Government's assigned personnel and resource(s).</p> <p>The Supplier's personnel, support and technical resource(s) will work diligently with the Local Government's personnel and resource(s) to resolve the Incident within the P2 Target Resolution Time or establish a workaround acceptable to the Local Government during that time. The Local Government's assigned personnel and resource(s) will be available on a 24 hour basis to support Supplier's troubleshooting efforts.</p> <p>The Supplier will remain in regular and ongoing contact with the Local Government's resource until Incident is resolved.</p>
<p>P3 – Medium One or more minor Solution functions are not working. The Local Government operations not significantly impacted. Major usability irritations impacting operations at the Local Government.</p>	<p>Within 1 business day of (the earlier of) Incident being discovered by Supplier or reported by the Local Government</p>	<p>Within 7 Business Days of (the earlier of) Incident being discovered by Supplier or reported by the Local Government</p>	<p>Working on the issue during Supplier Regular Business Hours with the same efforts as are employed for Priority 3 reports made by the Supplier's other customers. Supplier will use Commercially Reasonable Efforts to provide a workaround or, failing this, to incorporate fix into the next Release.</p>
<p>P4 – Low Minor usability irritations. Work-around exists.</p>	<p>Within business days of (the earlier of) Incident being discovered by Supplier</p>	<p>Within 30 Business Days of (the earlier of) Incident being discovered by</p>	<p>Working on the issue during Supplier Regular Business Hours with the same efforts as are employed for Priority 4 reports made by the Supplier's other customers. Supplier will use Commercially Reasonable Efforts to provide a workaround or incorporate fix into the next Release.</p>
	<p>or reported by the Local Government</p>	<p>Supplier or reported by the Local Government</p>	

5.5 Incident Resolution Criteria

The Incident shall be deemed to be resolved in respect of a Priority level shown in the table above when any of the following events or conditions is reached or attained:

- (i) The technical assistance and Support Services performed by the Supplier results in the Incident being resolved, or a workaround is identified by the Supplier and verified to the Local Government's reasonable satisfaction resulting in a downgrading of the severity of the fault or error, or the Incident is attributable to a feature request that has not yet be implemented; or
- (ii) the Supplier, acting reasonably, determines that the Incident is attributable to any of the following causes:
 - a) the Incident arises from modifications to the Solution other than as approved or provided by the Supplier; or
 - b) the Incident arises from a fault or error in the Local Government owned software, provided data, custom software or extensions, hardware, network, or database management system, vehicle under maintenance or defective or unusual operations.

5.6 Incident Resolution Assurances

5.6.1 In the event of the Supplier's failure to provide Incident resolution in accordance with the applicable Incident Resolution Target, the Incident will be designated at the next higher Priority level and the Supplier shall, as soon as is reasonably practicable:

- (i) perform a root-cause analysis to identify the cause of such failure,
- (ii) provide the Local Government with a report detailing the cause of, and procedures for correcting, such failure,
- (iii) implement such procedures which may include the development and/or use of measurement and monitoring tools (if appropriate), and
- (iv) provide the Local Government with assurance reasonably satisfactory to the Local Government that, following completion of the implementation of such procedures, the risk of such failure recurring will be minimized.

5.6.2 If the Local Government is unable to access the data, the Supplier will use Commercially Reasonable Efforts to support the Local Government to ensure Data is accessible. If, after the system installation, configuration and approval by the Local Government, the Data is not available to the Local Government for

- i) 60 consecutive days or
- ii) 90 Days during a fiscal year,

the Supplier shall be deemed to be in material breach of the Agreement and the Local

Government may (i) assent to modification(s) to the Solution or the Services as proposed by the Supplier to prevent future breaches, (ii) exercise those rights and remedies available to the Local Government under this Agreement, or (iii) terminate the Service(s) or the Agreement for cause.

6.0 Standard Request Fulfillment

6.1 Overview

Each request for a standard service task will be acknowledged as received and entered into the ticketing system within four Regular Business Hours of being submitted. It should also be noted that most standard requests can also be undertaken by the Local Government staff once trained; however, the Supplier can be engaged on an as-needed basis for standard request fulfilment.

6.2 Standard Request Response & Estimation Targets

6.2.1 The following provides for: (i) the applicable timelines for the Supplier's acknowledgement of standard requests reported by the Local Government support team and (ii) the turnaround targets for fulfilment for each standard request.

6.2.2 The start time for Standard Request Fulfillment Target begins immediately upon assignment of a ticket to a Supplier resource. It is the length of time the Local Government can expect these types of requests to be completed. Overall target is to achieve these goals overall 90% of the time, calculated monthly.

Request Description	Acknowledgement Target	Standard Request Fulfillment Target
Add new user	N/A Managed by the Local Government	N/A Managed by the Local Government
Reset Password	N/A Managed by the Local Government	N/A Managed by the Local Government
Unlock Account	N/A Managed by the Local Government	N/A Managed by the Local Government
Ticket based Training Query	4 Regular Business Hours	3 Regular Business Days to schedule Training

** Please note that this is not an exhaustive list. For standard requests not listed, a 4 Regular Business Hours acknowledgement target and 3 Regular Business Days fulfilment target will apply unless otherwise agreed between the Local Government and the Supplier.*

7.0 Service Availability

The Solution is available when it can be accessed or used by the Local Government and the Local Government's Users as contemplated under this Agreement.

7.1 Service Outages

7.1.1 Scheduled Maintenance

The Parties agree that Scheduled Maintenance may require the Services to become temporarily degraded or unavailable to Users. Supplier and Supplier Affiliates will use Commercially Reasonable Efforts to ensure such degradation/outage is scheduled outside of Regular Business Hours. If, despite these efforts, a Service

degradation/interruption/outage is unavoidable during Regular Business Hours, Supplier will provide written notification to the Local Government advising of the reasons for the degradation/outage and describing its efforts to undertake the Scheduled Maintenance outside of Regular Business Hours. The Local Government may, following receipt of this notification, decline the proposed Scheduled Maintenance window and reschedule to a later time outside of Regular Business Hours if the Local Government demonstrates in writing to the Supplier that the proposed Service degradation or outage will have a disproportionately deleterious effect on the Local Government's business operations, when compared to the adverse business impact that will be avoided by proceeding with the proposed Scheduled Maintenance. The Supplier will consider the Local Government's written submissions in good faith and will not unreasonably withhold, delay or condition its consent to reschedule. The process depicted in the table below will be followed in the event of any service degradation or outage might result from Scheduled Maintenance.

7.1.2 Emergency Maintenance

The Supplier may implement an Emergency Maintenance outage to install a critical security patch provided by a third party vendor, or to deal with an Incident where the severity of the Incident is such that an outage to correct on short notice is warranted. Supplier will use Commercially Reasonable Efforts to provide the Local Government at least 48 hours' notice of such required Downtime, or as long a notice period as is reasonably possible.

7.2.3 Unscheduled Outages

The Supplier will notify the Local Government immediately upon discovering the Solution is experiencing Downtime. During a period of Downtime, the Supplier will send regular notifications until the Solution is restored. Once the Solution is restored, a final notification to indicate as such is required.

8.0 Performance Measure

The Supplier will use Commercially Reasonable Efforts to ensure the Solution is operating within acceptable tolerances and will make available to the Local Government upon request, the monthly performance measurement and reporting tools and metrics showing reported, open and resolved Incidents, Service Availability and Downtime that are provided for in the Service Level Policy.

9.0 Disaster Recovery

9.1 Disaster Recovery Management

Disaster recovery is measured in terms of recovery time objectives (hereinafter, "RTO" - how long until the restoration of the Service), and recovery point objectives (hereinafter "RPO" - how much data is lost) from the point in time that a Disaster is declared.

10.0 Key Performance Metrics & Reporting

10.1 Annual Security Report

Upon request, the Supplier shall send written security reports detailing the results of annual audits (including compliance tests) performed on each physical data center for each solution area. These

annual audits are to be carried out by a neutral third party. The reports will be provided to the Local Government within forty-five (45) calendar days of the request. The reports shall cover the following certifications:

- (i) ISO 27001 Certification
- (ii) SOC 2 Report
- (iii) Penetration Test and Report performed by an accredited provider

11.0 Release Management

The Supplier shall review Release notes for important changes effecting customers and will provide the Local Government with written notice of any upcoming Release. If Supplier or the Local Government determines, acting reasonably, that a Release may materially degrade the Solution, the Local Government will undertake UAT with the prompt assistance of the Supplier, and will report any broken integration, degradation or instability in the Solution, or other defect/fault in the performance or functionality of the Solution. The Local Government Users will test the Release and Supplier will incorporate the test results into the deployment of the Release, providing workarounds, remedial actions, Release documentation and training as needed.
