

City of Fredericton

[2024 ANNUAL BUDGET]

City of Fredericton 2024 General Fund and Water & Sewer Fund Budget including Non-tax Revenue, General Revenue from Property Taxes and the Community Funding and Equalization Grant, Service Based Expenditures, Community and Strategic Partner Capital Grants, Capital Expenditures, Debt Service Costs, and estimates of Asset Depreciation at Fair Market Value for 2024. This budget is presented by the eight (8) Program Results areas.

GOVERNANCE & CIVIC ENGAGEMENT

Responsible and responsive; Vision, leadership, decisions

A strong, resilient and growing economy

MOBILITY

Safe, accessible options for movement in and around the community

A safe and secure community

A Clean, Green Community: Water, Land and Air

CORPORATE EFFICIENCY

Efficient, Effective and Responsive Internal Services

SUSTAINABLE INFRASTRUCTURE

Infrastructure ready for service at a cost we can afford

LIVABLE COMMUNITY

A Vibrant Inclusive, Well-planned, Connected and Active Community

COUNCIL'S VISION, PRIORITIES AND APPROACH FOR THE 2024 BUDGET

"An inspirational, growing city with a sense of community and culture, promoting thoughtful urban development, active living and a social, environmental and fiscal conscience" – 2021 Fredericton City Council Vision

OVERVIEW

The 2024 General Fund budget is based on a foundation of strong assessment growth which allows the organization to continue to invest in the community while addressing growth requirements and high inflation. All existing services have been maintained, and many services will be enhanced and improved. This is made possible by being focused on priorities and flexible in how resources are used to provide services. Over the past few years, there has been a strong focus on cultivating engagement with Council, with the public, and with City staff at all levels. This has resulted in a 2024 budget that provides affordable services while delivering public value in a long-term sustainable way. 2024 represents another year of increased investments in public safety resources, support for affordable housing and Sunday bus service will be introduced.

Market Assessment increases for 2024 remain high given a robust housing market and assessment adjustments. In general, residential properties saw an average increase of 9.82% with an overall market assessment increase across all sectors coming in at 7.86%. The development market resulted in new construction growth at 1.95%, so in total, the City saw an increase of 9.81% on its existing tax base for revenue. While market assessment increases are intended to cover growing costs of existing services, the new construction growth should allow the City to invest more in adding new or enhancing and improving services to increase the value provided to our residents and businesses. The tax base growth represents a strong, growing community.

LOCAL GOVERNANCE REFORM

In 2023, the City grew in area and population through the amalgamation of areas previously part of former local service districts. 2024 will see another year of transition as solid waste collection transitions to the municipality from the Province and the exploration of the City of Fredericton Police Force taking over police of jurisdiction from the Royal Canadian Mounted Police for the new boundaries.

SERVICE DELIVERY

In 2024, the City's budget focuses on keeping things affordable and fair – meaning results are achieved for the community while maintaining a reasonable tax effort and staying accountable to the taxpayer. With the 2024 assessment growth, the City is able to address high inflationary pressures to ensure stable and high-quality services continue to be provided to residents. The City is also providing a tax rate reduction of 1 cent for the majority of rate payers which brings a total reduction of 10.25 cents over a 3 year period.

The increase in assessment growth allows the City to be able to properly fund increased costs resulting from inflation. With some service contracts increasing by more than 18%, it is a challenge to maintain affordability. Of the 10.03% increase to revenue, 6.35% was allocated to inflationary impacts, 1.73% was allocated to growth related initiatives and 1.95% was allocated to new and enhanced services. Additional personnel costs are also being strategically added to work in areas of public safety, capital planning and funding, recreational programming, transit services and other areas to address growth needs, and additional support for our employees.

Chart 1: Comparison of increases in market assessments to inflation

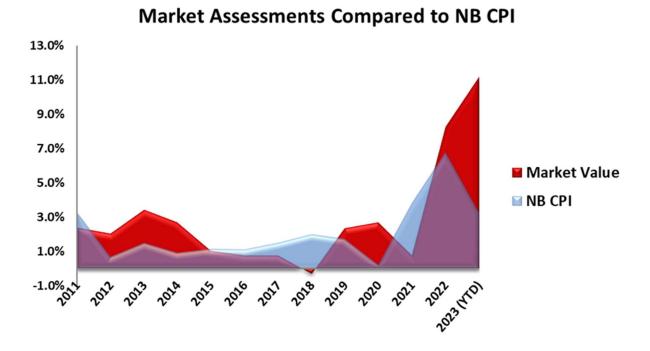

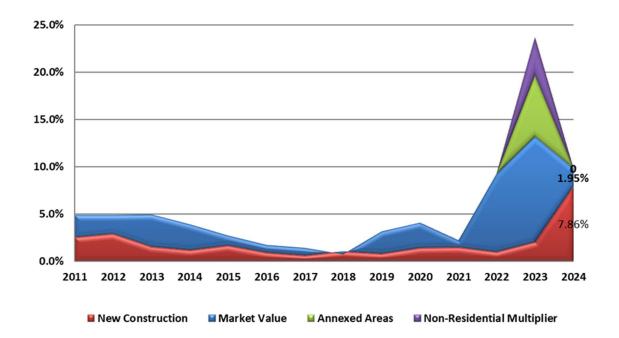

Chart 2: tax base revenue growth from market assessments and new construction

Growth in the Property Tax Base

MUNICIPAL TAX EFFORT

With the past trend of property tax assessments rising faster than CPI, the City was concerned that over time taxpayer affordability may be impacted. To better understand taxpayer affordability the City began tracking Municipal Tax Effort.

Municipal Tax Effort measures what percentage of household income is being used to pay for municipal property taxes and water and sewer rates.

Municipal Tax Effort =	Municipal Tax Burden Per Residentia l Unit
Municipal Tax Enort –	Household Income

Tax Effort by Household Income

For 2023, Fredericton's overall Municipal Tax Effort was 4.8%. This means that for the average residential unit 4.8% of their household income pays for municipal taxes and water and sewer rates. As shown in the chart, as income ranges increase so does the amount of municipal taxes paid; however, the amount of taxes paid compared to income decreases. The City provides a high level of service and value to all its taxpayers while remaining affordable. Even

Household Income	Avg. Municipal	Avg. Municipal				
Range	Tax Burden	Tax Effort				
\$ 25,000-40,000	\$ 2,546	6.4%				
\$ 40,000-55,000	2,720	5.0%				
\$ 55,000-70,000	3,127	4.5%				
\$ 70,000-85,000	3,650	4.4%				
\$85,000-100,000	4,084	4.0%				
\$100,000-115,000	4,744	4.2%				
\$ 115,000-130,000	4,805	3.6%				
>\$130,000	5,832	3.4%				
Total	\$ 3,246	4.8%				

for lower income ranges tax effort is still at an affordable level relative to the services being provided.

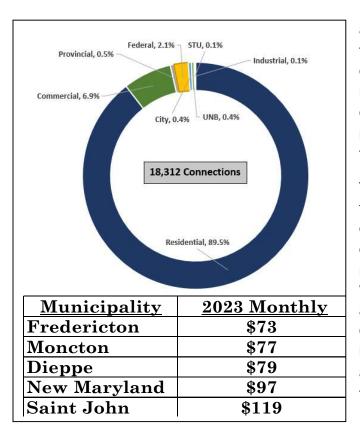

Tax Effort by Housing Type

Fredericton's residents also have a choice when it comes to affordability as their housing decision can impact their Municipal Tax Effort. Data shows that residential homes and condos tend to have higher tax efforts on average than apartments, senior housing, and mobile homes. Understanding tax effort relative to housing types allows citizens to make informed decisions that suit their needs and their level of affordability.

Municipal Tax Effort shows that Fredericton is an affordable city for its

residents in which they can play a role in determining their level of affordability.

Table 1. COMPARISON of average annual NB municipal water and sewer rates

Fredericton continues to have one of the lowest average annual costs for municipal water and sewer consumers in the Province of New Brunswick. Residents receive high quality drinking water and are provided with wastewater management services that meet federal guidelines for environmental stewardship. The City of Fredericton takes pride in the high-quality service provision that we provide to our nearly 18,300 customers.

The 2024 Water & Sewer Utility intends to maintain rates, for both the fixed quarterly service charge and the consumption rate. While we continue to see a decrease in consumption in residential accounts, one of the key principles of the long-term plan is to keep rates affordable. Water and sewer are an infrastructure-intensive services and require a significant investment every year. In 2024, the City continues to leverage other government funding to help reduce our infrastructure deficit and continue to address Federal guidelines as set out to meet or exceed these guidelines on an annual basis.

Strategies to maintain reasonable residential property tax effort

Focus on Cost Efficiency

- · Reduce operating costs through efficiencies and eliminating waste
- · Leverage existing infrastructure by increasing infill density
- Create additional value with affordable quality services and infrastructure that makes the City attractive to new residents and business and increases the population density

Diversify Revenue Base

- Reduce tax reliance on residential property taxpayers
- Focus on economic development to increase the size of the commercial tax base
- Increase non-tax revenues

Increase Median Income

- Focus on economic development to increase the size of the commercial tax base and employment opportunities
- Foster entrepreneurship
- Attract new residents to start new business, buy existing business and offset the aging population

CORPORATE STRATEGY

The City manages its risks related to slowing revenue growth, operating cost sustainability and continues to build a resilient organization capable of executing on Council's vision and preparing for the City's new Municipal Plan by using a corporate strategy focused on engaging the workforce in continuous improvement.

Engagement

There are many initiatives underway to help engage staff to continue to provide high quality services to the community

Attendance

Good attendance management means more capacity

Manage the workforce

Strategically adding resources where required

Innovation & Efficiency

Continuous Improvement culture of improving services and reducing waste

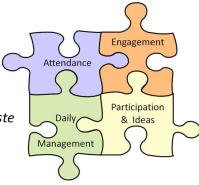

Planning and Focus

- > Plan for the future (Municipal Plan, Corporate Strategic Plan)
- Focus on Council priorities
- Alignment and accountability
- Corporate & Community Energy and Emissions Plans

CORPORATE STRATEGY RESULTS

The results of the corporate strategy lead to a flexible organization gaining efficiencies.

Capacity Built	Process improvements and efficiencies mean more time for staff to focus on delivering quality services that are high priority
Costs Avoided	Deeply leveraging existing resources and creating internal efficiencies has avoided the need to increase spending
Budget Savings	Efficiency projects and managing the workforce create real budget dollar savings that are permanently removed from the budget
Service Improvements	The culture of continuous improvements means services are continuously evaluated for improvement opportunities and better ways of delivering services

MANAGING THE WORKFORCE

Through the budget process the City is continuing to right-size staffing levels. In the past, the City grew staffing levels too quickly in too short of a period to an unsustainable level. The workforce reduction strategy and efficiency efforts have allowed the City to return staffing to 2002 levels in most areas, which is a sustainable level for the organization. As growth in the City occurs, the need for additional resources also increases. 2024 will see 10 new police officers added with 4 all or partially paid for through agreements, 4 new relief firefighters, 8 new full-time equivalent employees to support Sunday transit service. There will be a net 4.4 full- time equivalent employees added to the budget across other areas of the General and Water & Sewer Funds with adjustments planned to place a focus on fostering employment opportunities for our student population.

PUBLIC VALUE

Budgeting for Results

- Transform dollars into results creating public value
- Shown by cost of service, and results achieved
- Budget is a one-year snapshot of a longer-term plan aimed at achieving the City's vision

Maximize Value for Money

Attraction & Retention (population growth)

• Shows City is achieving results important to public – great place to live and do business.

Creating Value for Residents

• Service value outweighs additional costs.

Creation and Implementation of Strategies/Plans – Execute

- Municipal Plan
- Historic Garrison District Plan
- Officers Square Plan
- City Centre Plan
- Economic Development Strategy
- Corporate, Community Energy & Emissions Plans

FLEXIBILITY

The budget focuses on being **flexible** – allowing room to address community priorities and changes in conditions. In the long-term financial plan, debt load is managed to allow room to address one-time capital to deliver on key strategic Council priorities – such as the planned contribution to the Performing Arts Centre or the acceleration of implementing the plan for improvements to Officer's Square.

Flexibility allows the ability to:

- Adapt to changing needs/perceptions
- Accomplish community vision (Municipal Plan) and Council priorities over time and within a reasonable level of tax effort (affordability)
- Allows the City to manage in a time of crisis and the ability to deliver a balanced budget without negatively impacting service delivery

DEBT AND ONE-TIME CAPITAL

Flexibility for Council's key strategic and significant capital initiatives

Debt Servicing Costs – principal and interest payments on long term borrowings.

- Used for major capital projects that provide long term value to citizens.
- Used for longer lived assets that benefits those paying for it over a long period of time (Intergenerational Equity).

One Time Funding – available in years where new debt is not incurred but maintains 8% capacity room for debt.

• Used to further key strategic Council priorities to meet the needs of the community.

DEBT PRINCIPLES

- Debt is not used for on-going renewal, repairs, and replacement projects. The City "doesn't borrow to buy groceries or for household repairs".
- Debt room is preserved to provide flexibility in financing long-term major capital priorities towards Council's mandate every 4-8 years
- Debt financing spreads the cost of assets over a longer portion of their useful lives. Paid by those that use the assets over time.
- Good planning means that the people who benefit from an asset are also the ones who pay for it (intergenerational equity)
- Careful that debt servicing payments don't reduce fiscal room and crowd out other spending and therefore Council Policy endorses an 8% limit on debt

SUSTAINABILITY

Considering the impact of today's decisions on future generations:

- Financial sustainability requires long-term planning; it does not just happen
- "Spending the right money on the right things at the right time" within financial constraints
- "Meeting existing service delivery without compromising the ability to meet future needs"
- Consideration of the impacts to construction projects and operations on the environment

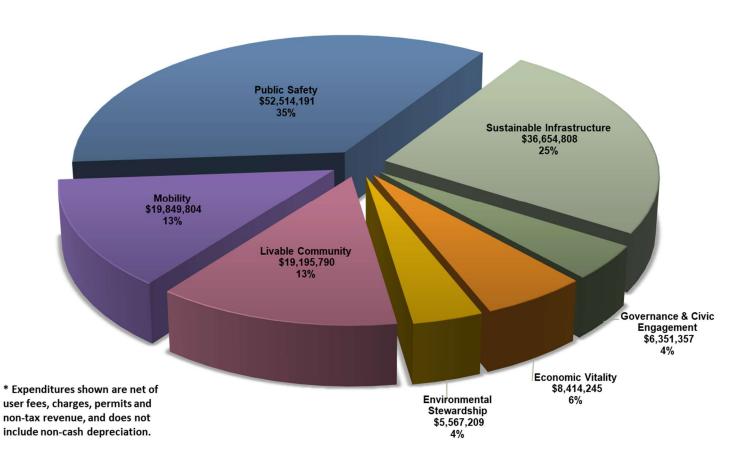

Fiscal Strategy – Capital Funding & Financing Balances Renewal with New, and aligns PAYGO and Debt

- PAYGO Capital and Debt ≈ 20%-25% of budget
- Debt less than 8% of budget
- Infrastructure replacement funding strategy
- Reduce infrastructure deficit over 20 years
- Carefully managed capital asset management plan
- Preventative maintenance
- Rationalize, right-size and optimize existing infrastructure
- Tie to service delivery and demand

2024 Focused Service Improvements & Enhancements

- Corporate Leadership Continuing to embracing Local Governance Reform and supporting regional, provincial, and federal partnerships. Additional funding for purchase and servicing of land for affordable housing needs.
- Economic Vitality support through community funding partner groups and continued investment in festivals and events. Implementation of Year 2 of the Affordable Housing Strategy and advancing the South Core Plan.
- Environmental Stewardship Advancement of both the Corporate and Community Energy and Emissions Plans and preparation of an electric vehicle strategy. 2024 sees the introduction of a new grant pool related to Climate Change Action Grants. Introduction of pilot programs for enhanced yard waste pick-ups, back yard composting and interim changes to multi-unit residential recycling.
- Livable Community Continued reinvestment in the downtown urban core, executing on the City Centre Plan with continued investments in the shared street concept with Officers Square and new park development as well as completion of major park plans. Exploration and development of a new River Keepers initiative and activating nonmotorized access to our beautiful rivers. Incremental investments to the Botanical Gardens and programming and operational costs for Officers Square. Implementation of year 1 of the Heritage Plan.
- Mobility Introducing Sunday transit service and advancements made for Para Transit with new provider and technology. Focused concrete maintenance and vegetation removal in the downtown core
- Public Safety Baselining the community safety services unit to support the community. Increasing use of technology for improved and safer service delivery. Continued focus on training for all aspects of public safety. Incremental resources in both Police and Fire to support improved service delivery.
- ✓ Corporate Efficiency Strong focus on cybersecurity to maintain integrity of Corporate systems.

RESULTS AREAS FUNDED FROM GENERAL REVENUE

2024 Result Areas Funded from General Revenue

The budget creates value through eight municipal Program Result Areas. Each Program Result Area has specific strategies and objectives outlined through the Municipal Plan, Master Plans and Studies. Council articulates priority areas of focus through the governance and civic engagement process throughout the year.

GENERAL FUND BUDGET SUMMARY

CITY OF FREDERICTON

General Fund 2024 Annual Budget

	% of Budget	2024	2023

2024 Capital Budget

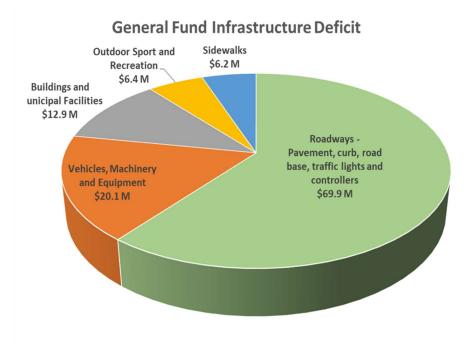

GENERAL FUND TANGIBLE CAPITAL ASSET VALUES AND INFRASTRUCTURE DEFICIT

The total estimated replacement cost of the General Fund infrastructure is estimated to be one billion two hundred and ten million dollars (\$1.21B) (see Chart 1 below). There are tangible capital assets owned by the City that have reached the end of their useful lives but have not yet been replaced. The current replacement cost of these assets is referred to as the infrastructure deficit and is estimated to be one hundred and fifteen million dollars (\$115M) (see Chart 2 below).

GENERAL FUND LONG-TERM FINANCIAL PLAN AND CAPITAL POLICIES

The City is addressing the infrastructure deficit through its fiscal policies and long-term financial plan. The Long-term Financial Plan (LTFP) prescribes the level of funding required for infrastructure renewal that will reduce the infrastructure deficit over a twenty-year period. There are three key components of Council's adopted financial plans and polices that make this strategy effective:

- 1. Fiscal policy requires that seventy five percent (75%) of the pay-as-you-go capital budget be spent on infrastructure renewal or rebuilding and sets a target of no more than ten percent capital spending on new infrastructure.
- 2. The LTFP provides an additional five percent (5%) for infrastructure deficit funding each year; and
- 3. Debt service costs are limited to eight percent (8%) of the total budget to maintain sufficient pay-asyou-go capital budget.

The Plan intends to bring the infrastructure capital investments to a level that is sustainable and pays for the infrastructure used today to not encumber future generations. Without the Council adopted LTFP and fiscal policies the infrastructure deficit would continue to grow.

CAPITAL BUDGET FUNDING ALLOTMENT & ALLOCATION

The annual capital budget funding allotment is based on the proposed revised Long-term Financial Plan and policies for Capital Prioritization and Investment, and Debt Affordability Management. The budget follows the financial plans and policies by allocating seventy five percent (75%) of the annual pay-as-you-go base budget to infrastructure renewal, ten percent (10%) to capital maintenance and planning, ten percent (10%) to new infrastructure, and five percent (5%) to promote and support existing growth. An additional five percent is added to the prior year's renewal amount for infrastructure deficit funding.

Debt service costs are limited to eight percent (8%) of total revenues. Any amount of the debt service budget that is not committed to existing debt servicing costs are available in the capital budget as one-time capital amounts.

Capital Budget Funding Capital Budget Policy 2024 Amount Annual pay-as-you-go capital budget 0% Increase over prior year \$ 21,135,588 Infrastructure deficit funding 5% Increase over prior year renewal budget 792,585 21,928,173 Total pay-as-you-go capital budget One time capital 8% Debt limit, less existing debt service costs 6,416,022 **Total Funding Available for Capital Budget** \$ 28,344,195

Capital projects are Approved that deliver on Council's Vision of "An inspired City with a sense of community, fostering innovative development, active living and a social, environmental and fiscal conscience".

The capital budget for 2024 builds on the following themes from Council's vision:

- Responsible Infrastructure
- Implementation of the City Centre Plan, Officer's Square and Historic Garrison District Plans
- Park Plan Implementation
- Neighborhood Parks and Trails
- Active Transportation
- Accessible Transportation
- Amenities that Attract
- Sustainable Energy
- Corporate Efficiencies

NON-TANGIBLE CAPITAL INCLUDED IN THE SERVICE BASED (OPERATING) BUDGET

Non-tangible capital asset (NTCA) expenditures are costs related to the stewardship and care of capital assets and infrastructure. These costs typically include pre-planning and design, professional services, long-term plans, consulting and public engagement, and maintenance and renewal of smaller assets that do not meet the dollar threshold of the capitalization policy.

NTCA expenditures are not included in the capital budget. Instead, they are included in the cost-ofservice delivery and presented with the service-based budget. Capital assets and infrastructure are used in the delivery of services, so costs associated with infrastructure operations are linked to the services rendered in the service budget. This information is provided to communicate areas of emphasis related to capital planning, and to highlight the renewal and on-going care of existing infrastructure.

Non-tangible Capital to be Included in the Service Based (Operating) Budget

Program

NO TES:

*City receives the revenue. The 1.7 represents the business tax rate.

*The above Property Tax Rates apply to all properties (land & buildings) within the City limits, per \$100 of assessment.

*Depending on the zoning, the City generally pays the Commercial Property Tax Rate (2 & 3 above).

*The City also pays the BIA Rate of 20¢ on some buildings, such as City Hall, Police Station, Convention Centre and Parking Garages.

*Residential Tenancy Administration Fee came into effect on 1992 December 11-which is a fee for the cost of the Rentalsman Office.

*The combined tax base for 2024 increased by 9.81% over 2023.

*The base used for 2024 to set the Tax Rate was \$11,517,867,640 which does not include Federal properties.

NON-RESIDENTIAL TAX RATE:

*PNB levies a property tax on non-residential (commercial) property within municipal boundaries. A development in the downtown core pays a total rate of \$4.3340. Of that total, the City of Fredericton collects \$2.2586, or 52% of the total tax charged. The BIA levy of 0.20 is a tax imposed upon businesses by themselves through Downtown Fredericton Inc.

(a) GNB reduced the provincial tax rate for non residential properties from \$2.1860 to \$1.8560 effective 2023.

(b) GNB reduced the provincial tax rate for non-owner occupied residential properties from \$1.1233 to \$0.5617 effective 2023.

WATER & SEWER STRATEGY

GOAL

To continue to provide safe, reliable drinking water to customers and environmentally sound wastewater treatment at affordable rates competitive within the region, while addressing infrastructure needs to minimize service disruptions.

KEEPING YOU WATER SAFE AND CLEAN

SUMMARY

- Per the long term financial plan to keep in line with inflation and capital investments, revenue increases of 5% at planned for 2024
- Each year, more of the water & sewer revenue continues to go directly towards infrastructure renewal than operations when including capital funding from other levels of government.
- Borrowing is typically not used for infrastructure renewal in the Utility as it simply delays the infrastructure issue and results in less funding available for renewal. It defers the problem, costs more and means less money available to put directly into infrastructure. It is like using debt to fund annual household repairs.

FUNDING STRATEGY

The Water & Sewer Long-term Financial Plan strategy is to take care of the infrastructure while minimizing rate increases and avoiding rate shock by:

- 1) Aggressively pursuing funding to pay for the cost for any new legislated water and wastewater standards so rate payers do not pay for this cost.
- 2) Obtaining an additional \$30 million in other government funding over 10 years to go directly towards addressing the infrastructure deficit and continuing to seek more funding.
- 3) Not spending interest to borrow for renewal which would be equivalent to borrowing to finance on-going household repairs.
- 4) Acknowledging the significant infrastructure issue by addressing it in a planned manner and not deferring the problem for future generations to deal with at a much higher cost; and
- 5) Adjusting rates over time and keeping rates less than and competitive within the region.

WATER & SEWER BILL STRUCTURE

A City of Fredericton Water & Sewer bill is made up of two components:

- 1) Fixed fee called a quarterly service charge
 - a. Is used to fund infrastructure to get water to and from the customer and the operating costs associated with this infrastructure
- 2) Variable fee called consumption rate
 - a. Is used to fund the operating costs associated with moving the water around and varies depending on the amount of water used by customers

Currently there is a mismatch between how revenue is generated and how it is spent. Eighty percent (80%) of the costs of the utility are fixed and do not change based on the amount of water used. The remaining 20% of the cost deals with the treatment of the water and wastewater based on volume consumed.

For the average household, the typical split on the water and sewer bill was 50/50 meaning half the bill is based on a fixed fee and half the bill is based on the amount of water used (consumption).

This means that customers still can save on their water bill by conserving and allows the City to collect revenue to ensure appropriate levels of infrastructure renewal.

The rate structure is reviewed annually to determine the sustainability of the system compared with affordability.

THE LONG-TERM FINANCIAL PLAN DOES NOT INCLUDE BORROWING FOR

RENEWAL

Within the General Fund, the strategy has been to build up debt borrowing room for key strategic major Council priority projects. Borrowing is not used for on-going infrastructure renewal. Over a 10-year period of high growth years, money was set aside for this type of borrowing and was built into the budget. The City uses the Pay As You Go capital budget for the infrastructure renewal and only uses debt for flexibility to fund a key strategic Council priority every number of years.

Similarly, there is no borrowing in the water and sewer fund for infrastructure renewal projects. If there was debt financing over a 20-year period, a sizable portion would go towards interest. That means, Water & Sewer could lose up to \$58 million to interest payments over 20 years. That is money that now goes directly towards investment in infrastructure renewal.

This borrowing would only be a short-term fix and defers truly addressing the infrastructure issue. Once the borrowing is made, that funding is committed to make the debt payments for 20 years and cannot be used for infrastructure renewal in the following years until the debt payments are paid-off in 20 years. By following a Pay As You Go Model, every dollar of capital funding goes directly to infrastructure renewal. The infrastructure renewal required is year after year investment in replacing 1% of that infrastructure in addition to addressing the \$189M infrastructure deficit, or backlog of old infrastructure needing replaced today.

HISTORY OF WHY INCREASES HAVE BEEN REQUIRED

- 1) Water & Sewer infrastructure lasts a long time and until the early 2000s, there was no realization or emphasis on the requirement to build up funding to replace old infrastructure. Pipes and systems were within their life cycles.
- 2) Revenue was used for day-to-day operations and infrastructure extensions, not for replacing old infrastructure.
- 3) Over the period of 1990 2013, there were many years of no rate increases and in other years, increases that did not even keep pace with inflation. Also, increases were only applied to the consumption rate. Therefore, the consumption and fixed rate ratio became off balance.
 - a. From 1990-2004, over the 14-year period, there were eight (8) years of zero increases.
 - b. For the other years, rate increases were low and did not keep pace with inflation.
- 4) The biggest portion of the revenue generated was historically based on consumption. Since 2008, consumption decreased 21.9% while the biggest portion of the cost is fixed for infrastructure replacement. During the pandemic, due to office, businesses and universities being closed, there was a sharp decline for 2020/2021.
- 5) Looking at the situation today, the amount of infrastructure that should be funded for replacement annually (called "depreciation") is \$17.6 million. This does not include the additional backlog of old infrastructure needing replaced. The revenue generated to pay for infrastructure is \$10.6 million. This means that the infrastructure deficit will grow by \$7M in 2024 alone (not including funding from other levels of government).

THE IMPORTANCE OF THE INVESTMENT MADE TO KEEP OUR WATER SAFE AND RELIABLE.

SERVICE DISRUPTIONS CAUSED BY WATER MAIN FAILURES

Infrastructure Renewal is needed to continue to deliver high quality drinking water, and to minimize service disruptions. Boil orders can have a significant impact on residents. Failed water mains have been the number one cause of boil orders in New Brunswick over the past 10 years.

Since 2006, 118 different municipalities have reported boil orders to the New Brunswick Chief Medical Officer. Almost half of the boil orders reported were a result of water main breaks and loss of pressure in the water system.

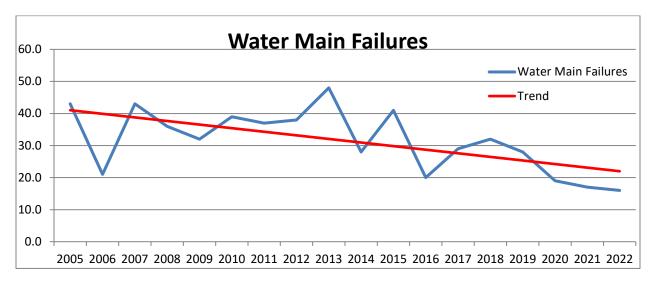

Fredericton has had only one (1) wide-spread boil order in the past ten years lasting only three (3) days. This was a precautionary measure due to construction in that area and not the result of any contamination issue.

The City's investments, targeted at areas with high water main breaks, have been successful in preventing serious service interruptions. However, with older infrastructure, the City is still susceptible

to water main breaks which cause service interruptions and impact residents. That is why the City has a plan to continue to focus on addressing the infrastructure deficit and infrastructure renewal.

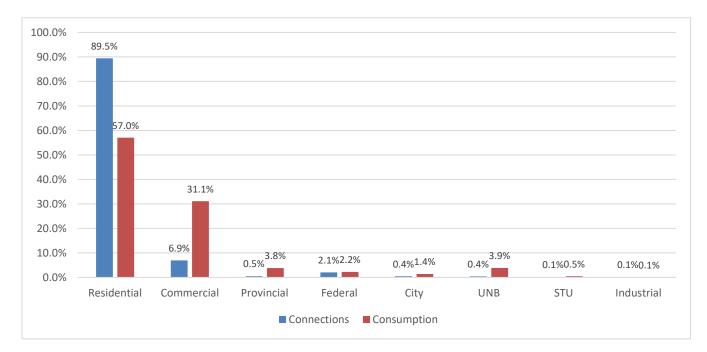

WATER MAIN BREAKS

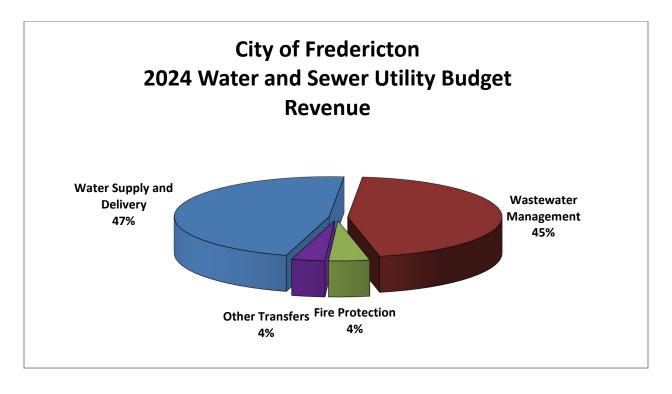

Infrastructure renewal helps keep water main failures from trending higher. This helps avoid service disruption due to contamination or boil orders.

[RESOLUTIONS OF CITY COUNCIL]

<u>RESOLUTION NO: 1</u>

Moved by _____, seconded by _____

BE IT RESOLVED THAT the Council of the City of Fredericton hereby directs the City Treasurer to develop the Long-Term Financial Plan for review and consideration by City Council based on the following tax rate adjustment strategy:

1. Increase the tax rate for newly amalgamated areas at a rate of five (5) cents per year, beginning in 2024, such that the tax rate for each sub-unit (being Saint Mary's LSD, Former LDSD, and Lakeside Estates) becomes equal to 95% of the applicable Inside tax rate; and,

2. Increase the tax rate for properties on the outside rate at a rate of five (5) cents per year, beginning in 2024, such that the tax rate for outside areas becomes equal to 95% of the applicable Inside tax rate

<u>RESOLUTION NO: 2</u>

Moved by _____, seconded by _____

BE IT RESOLVED THAT the Council of the local government of The City of Fredericton approves and authorizes the General Fund Operating Budget for 2023, being: The sum of \$168,218,223 be the total operating budget of the local government, that the sum of \$148,212,886 be the Warrant of the local government for the ensuing year, and that the tax rate(s) for the Municipality be: Fredericton-In (00) \$1.3286, Fredericton-Out (01) \$1.1065, Saint Mary's (04) \$0.5559, Former LDSD (05) \$0.6786, Lakeside Estates (06) \$0.6362 and Lincoln (07) \$0.5042. The Council orders and directs the levying by the Minister of Local Government of said amount on real property liable to taxation under the *Assessment Act* within the local government of The City of Fredericton; AND

BE IT FURTHER RESOLVED THAT the Council of the Municipality of the City of Fredericton set the non-residential tax base ratio at 1.7

Moved by _____, seconded by _____

BE IT RESOLVED THAT the Council of the Municipality of the City of Fredericton directs that the amount of \$28,344,195 for the 2024 General Fund Pay As You Go Capital budget be approved in accordance with the Public Procurement Management Policy No: COR-POL-023; and

BE IT FURTHER RESOLVED THAT the Council of the Municipality of the City of Fredericton hereby authorizes and directs the Mayor and City Clerk to execute any CCDC2 and CCDC4 contracts for the acquisition of the assets and the completion of the construction projects listed and approved as part of the 2024 Capital Budget; and

BE IT FURTHER RESOLVED THAT the Council of the Municipality of the City of Fredericton hereby authorizes and directs the Mayor and City Clerk to execute any agreements of purchase and sale and such further legal transactional documents as required in relation to the approved construction projects that form part of the 2024 Capital Budget with content satisfactory to the Director of Engineering and Operations, or designate, and in a form and content approved by the City Solicitor, or designate; and

BE IT FURTHER RESOLVED THAT the Council of the Municipality of the City of Fredericton hereby directs that any 2024 capital budget savings within Corporate Fleet Capital be reallocated to the next top priority vehicle/equipment on the infrastructure deficit listing; and **BE IT FURTHER RESOLVED THAT** the Council of the Municipality of the City of Fredericton hereby authorizes and directs the Purchasing Manager and Fleet Manager to pre-order, to a maximum of \$2,000,000 each year, for future years capital purchases pursuant to the 5 Year Capital Project Plan to help offset inflationary and supply chain issues for 2025, 2026 and 2027.

Moved by _____, seconded by _____
