Home / Traffic Calming 2024

Traffic Calming 2024

The City of Fredericton regularly receives requests for traffic calming throughout the city. City staff evaluate these requests, and depending on a variety of factors, traffic calming can be a great solution to address speeding concerns. The city has a traffic calming policy in place that helps staff prioritize requests and in a way that factors in travel speeds, traffic volume, collision data, pedestrian infrastructure, etc. From this, a priority list is created and every year traffic calming is implemented based on available budgets.

Traffic calming measures will be implemented in the following neighborhoods during the 2024 construction season: Douglas Avenue, Canterbury Drive, and Highland Avenue.

What is traffic calming?

What's next?
